Perl Graphics Programming Shawn Wallace, 2002-12-19 Graphics programmers aren't the only ones who need to be proficient with graphics. Web and applications programmers know that a dull web page can be quickly transformed into one that's interesting and lively with the use of well-planned graphics. And fortunately, you don't need the skills of a fulltime graphics programmer to use graphics effectively. From access counters and log report graphs to scientific plots and on-the-fly animated GIFs, graphics scripting is within the grasp of most web programmers. Using open source software, like Perl, you have the power to dynamically generate graphics based on user input and activity, easily manipulate graphics content, and optimize graphics for compression and quality. Geared toward Perl users and webmasters, Perl Graphics Programming focuses on open-source scripting programs that manipulate graphics files for use on the Web. The book demystifies the manipulation of graphics formats for newcomers to the Web with a practical, resource-like approach. With this book you'll learn to: Generate dynamic web graphics with charts, tables, and buttons Automate graphics tasks (thumbnails and borders) Create dynamic web documents (PDF, Postscript) Produce rich Internet experiences with Flash and SVG You'll begin with a tour of the most common web graphic file formats--PNG, JPEG, GIF, SWF, SVG, Postscript and PDF--then you'll explore the most powerful tools and Perl modules available for manipulating these graphics, such as GD, PerlMagick, and GIMP. Included in this part of the book is a thorough description of the Ming module for creating on-the-fly Flash files. Next, a cookbook section includes practical, all purpose recipes: GIF animation, generating images within a dynamic application, communicating between SWF front-end and Perl back-end, XSLT transformations, compression, and much more. Perl programmers naturally turn to Perl to tackle whatever challenge they have at hand, and graphics programming is no exception. Perl Graphics Programming provides all the tools you need to begin programming and designing graphics for the Web immediately. This book will change how you think about generating and manipulating graphics for the Web.

Noah Davis Noah Davis, 2020-09-01 Providing a crucial record of the painter Noah Davis's extraordinary oeuvre, this monograph tells the story of a brilliant artist and cultural force through the eyes of his friends and collaborators. Despite his exceedingly premature death at the age of 32, Davis's paintings have deeply influenced the rise of figurative and representational painting in the twenty-first century. Davis's emotionally charged work places him firmly in the canon of great American painting. Stirring, elusive, and attuned to the history of painting, his compositions infuse scenes from everyday life with a magical realist atmosphere and contain traces of his abiding interest in artists such as Marlene Dumas, Kerry James Marshall, Fairfield Porter, and Luc Tuymans. This catalogue is born of the unique relationship between Davis and Helen Molesworth, whom Davis entrusted to be the curator of his work. It is published on the occasion of the 2020 exhibition at David Zwirner, New York, which travels to The Underground Museum in Los Angeles, a space that Davis founded with his wife, artist Karon Davis. In her introduction, catalogue essay, and interviews with important figures in Davis's life, Molesworth shows how the artist's generosity and sense of responsibility galvanized a uniquely supportive artistic community, culture, and vision. Together with color illustrations and archival photographs, the book features

heartfelt testimonials that unfold in the intimate yet expansive spirit of studio visits with people close to him.
