Choosing Raw Gena Hamshaw, 2014-07-01 After her health journey led her to a plant-based diet, Gena Hamshaw started a blog for readers of all dietary stripes looking for a common-sense approach to healthy eating and fuss-free recipes. *Choosing Raw*, the book, does in an in-depth manner what the blog has done for hundreds of thousands of readers: addresses the questions and concerns for any newcomer to veganism; makes a plant-based diet with many raw options feel easy instead of intimidating; provides a starter kit of delicious recipes; and offers a mainstream, scientifically sound perspective on healthy living. With more than 100 recipes, sumptuous food photos, and innovative and wholesome meal plans sorted in levels from newcomer to plant-based pro, Hamshaw offers a simple path to health and wellness. With a foreword by Kris Carr, New York Times best-selling author of *Crazy Sexy Diet*, *Choosing Raw* is a primer in veganism, a cookbook, the story of one woman's journey to health, and a love letter to the lifestyle that transformed her relationship with food.

Part I covers basic molecular biology, and Part II offers imaginative dry labs and wet labs that can be done by both college and precollege students. Part III is an innovative section addressing the social issues and public concerns of biotechnology. Extensive appendixes provide important background information on basic laboratory techniques and teaching resources, including overhead masters and templates. essential laboratory activities, and relevant social issues and concerns attendant to today's molecular biology revolution. Environmental Physiology of Animals Pat Willmer, Graham Stone, Ian Johnston, 2009-03-12 The new and updated edition of this accessible text provides a comprehensive overview of the comparative physiology of animals within an environmental context. Includes two brand new chapters on Nerves and Muscles and the Endocrine System. Discusses both comparative systems physiology and environmental physiology. Analyses and integrates problems and adaptations for each kind of environment: marine, seashore and estuary, freshwater, terrestrial and parasitic. Examines mechanisms and responses beyond physiology. Applies an evolutionary perspective to the analysis of environmental adaptation. Provides modern molecular biology insights into the mechanistic basis of adaptation, and takes the level of analysis beyond the cell to the membrane, enzyme and gene. Incorporates more varied material from a wide range of animal types, with less of a focus purely on terrestrial reptiles, birds and mammals and rather more about the spectacularly successful strategies of invertebrates. My 21 Years in the White House Alonzo Fields, 2019-11-22 My 21 Years in the White House, first published in 1960, is the fascinating account by Alonzo Fields of his service as head butler under 4 presidents: Hoover, Roosevelt, Truman, and Eisenhower. Fields (1900-1994) began his employment at the White House in 1931, and kept a journal of his meetings with the presidents and their families; he would also meet important people like Winston Churchill, Princess Elizabeth of England, Thomas Edison, John D. Rockefeller, presidential cabinet members, senators, representatives, and Supreme Court Justices. He would also witness presidential decision-making at critical times in American history -- the attack on Pearl Harbor, the death of Franklin Roosevelt, the desegregation of the military, and the outbreak of hostilities in Korea. As Fields often told his staff, "...remember that we are helping to make history. We have a small part ... but they can't do much here without us. They've got to eat, you know." Included are sample menus prepared for visiting heads-of-state and foreign dignitaries.
