we've been told about our food--and takes readers on a journey to find healthy options. There's so much confusion about what to eat. Are you jumping from diet to diet and nothing seems to work? You'll discover:

- How nutrition research is manipulated by food company funded experts
- How to spot fake news generated by Big Food
- The tricks food companies use to make their food addictive
- Why labels like all natural and non-GMO aren't what they seem and how to identify the healthiest food
- Food marketing hoaxes that persuade us into buying junk food disguised as health food

A delight to read.” –Philip Yancey Our bodies are designed to heal. We fall off our bikes and skin our knees—and without effort on our part, the skin looks like new in a few days. But while our skinned knees easily heal, it can sometimes feel like our emotional and relational wounds are left gaping open, broken beyond repair. If our bodies instinctively know how to heal physical injuries, could they also help us understand how to restore painful emotional and relational ruptures? In their groundbreaking debut book, physician Jennie McLaurin and scientist Cymbeline T. Culiati write *Designed to Heal*: a fascinating look at how the restorative processes of the body can model patterns we may adapt to heal the acute and chronic wounds of our social bodies. Through engaging patient stories, imaginative travels through the body’s microcellular landscapes, accessible references to current research, and reflections on the image of God, *Designed to Heal* offers a new perspective for healing our social divisions. By learning how the body is created with mechanisms that optimize a flourishing recovery from life’s inevitable wounds, we are given a model for hopeful, faithful, and enduring healing in all other aspects of our lives. Our wounds don’t have to have the last word.
